EDUCATION

Dayananda Sagar College of Engineering
Information Science and Engineering - **9 CGPA**

October 2023 – Present
Bangalore, India

SKILLS

Programming Languages: JavaScript, TypeScript, GoLang, Python, Bash, C, C++

Libraries/Technologies: Next.js, React, Redux, Express.js, FastAPI, LangChain, Tailwind CSS

Tools/Databases: Git, GitHub, PostgreSQL, MongoDB, Redis, ChromaDB, NeonDB, Firebase, Prisma

Cloud & DevOps: Docker, Kubernetes, Terraform, Helm, Istio, GitHub Actions, Prometheus, Grafana, Jaeger, AWS, GCP

EXPERIENCE

Klugsys

November 2025 - Present

Software Developer

- Built **AI-powered QA assistant** using **FastAPI**, **MongoDB**, **Redis**, **ChromaDB** that auto-generates **test cases**, **traceability matrices**, and **coverage reports** from SRS documents.
- Implemented **LangChain ReAct agent** with **RAG search**, **sentence-transformers** embeddings, policy summarization, **Clerk JWT multi-tenant auth**, and **Redis session state with sliding window memory**.

Open Healthcare Network

July 2025 - November 2025

Full Stack Developer

- Contributed to open-source **care_fe** healthcare platform with **global distributed team**, **authored/reviewed PRs** for **UI/backend features** and **mobile fixes**.
- Actively participated in **code reviews**, **issue discussions**, and **onboarding newcomers** while maintaining high code quality, comprehensive documentation, and open-source best practices.

PROJECTS

3RVision-Platform | *Terraform, Kubernetes, Istio Service Mesh, Prometheus, Jaeger, Grafana*

[GitHub](#) | [Blog](#)

- Built production-grade **Kubernetes + Istio service mesh** for 3-tier microservices (Next.js frontend, Go backend, Flask ML) with **Terraform IaC provisioning**.
- Implemented **canary deployments** (90/10 traffic split), **strict mTLS encryption**, circuit breaking, and **header-based routing** for zero-downtime rollouts.
- Deployed full **observability stack**: **Prometheus metrics**, **Jaeger distributed tracing**, **Grafana dashboards** with automated deployment scripts.

AI-Powered Brochure Generator | *Docker, EKS, ECR, S3, Prometheus, Grafana, GitHub Actions*

[GitHub](#)

- Built **AI-driven web app** using OpenAI GPT models to generate customized property brochures with professional PDF outputs in English and Arabic.
- Designed **containerized microservices architecture** using **Docker** deployed on **Amazon EKS** with automated scaling.
- Implemented **GitHub Actions CI/CD**, **ECR registry**, **Prometheus/Grafana monitoring**, and **S3 storage** for production reliability.

ACHIEVEMENTS

- **1st Rank, FantomCode'25**: Outperformed **80+** national teams by building a standout **AI-powered sustainability platform**.
- **Patent Published (Co-Inventor)**: “*Sustainability Analysis Method and System for Item Classification and Disposal Recommendations*” in **The Patent Office Journal No. 46/2025** on **14/11/2025**.
- **Kubernetes Badge – Dev.to**: Recognized as top weekly **#kubernetes** author for “Learning Istio the Hard Way: A Real Service Mesh Lab with Canary, mTLS, and Tracing.”
- **Ranked 1st, Interns Leaderboard – Open Healthcare Network**: Achieved top position among **40** interns across all categories for consistent, high-impact open-source contributions.
